

Report on First Distribution of Polish Recovery Version—15 March 2018

Thank you for your prayers for our first distribution of the Polish New Testament Recovery Version.

On 15 March, from 9 am to 2 pm, 10 saints participated in distributing the newly printed Polish New Testament Recovery Version at the Pedagogical University of Krakow (a small university with 15,000 students) during their open day for prospective students. We had a table on the public sidewalk near the entrance to the university, and we gave out 175 Polish New Testaments and 5 English New Testaments. 29 of the recipients subscribed to receive emails from Bibles for Europe. These emails encourage them to read and appreciate the Bible and give them an option to join a Bible study. Also during the distribution 4 people prayed to receive the Lord, and 8 personal contacts were established. One sister already had a positive appointment that evening with one of the students whom she met.

We had a good response from community people as well as from university and high school students. Even a taxi driver honked at us and asked us to bring him a Bible before the traffic light changed. Word spread fast that we were giving out Bibles. We brought with us more than enough Polish Bibles based on a previous distributions of English Bibles in the city, but we ran out twice and had prepare more Bibles at the distribution table. Praise the Lord for His blessing!

We are planning to distribute more Bibles at three other universities next week (and one in April) during their open days. Thank you for your prayers. Please pray for the Bible recipients, for the follow-up care, and for the next distributions.

Much grace,

The saints who serve in Krakow
